

You want the students to get into pairs and find out from their partner 3 things that they did at the weekend, and write them down *in note form*.

You want the ss to play “what's my job?” in small groups of 3 or 4. One student thinks of a job, and the other ss have to ask yes or no questions to try and guess what it is.

You want your ss to play “word tennis” in pairs or 3s. You are going to supply a category (eg cars) and the pairs take turns to say a piece of car-related vocabulary until their partner can't think of another one.
The category is animals.

You want the students in pairs or 3s to *write* 5 basic grammar quiz questions to test the rest of the class.
(eg 1. what is the past tense of “go”?)
